G.R.O.W.T.H: A SYSTEMATIC FRAMEWORK FOR ENHANCING GRADUATE EMPLOYMENT THROUGH DATA-DRIVEN JOB MATCHING

A Capstone Project Presented to the Faculty of

College of Computer, Information and Communications Technology Department

Cebu Technological University-Main Campus

In Partial Fulfillment

of the Requirements of the Degree

Bachelor of Science in Information System

By

Daluag, Kinneth A.

Desabille, Lucky Arius G.

Ventic, Mc Bill Kline U.

Yamyamin, Ana Mae C.

Noreen B. Fuentes, Ph. D, DIT

Adviser

May 2025

APPROVAL SHEET

The Capstone Project entitled **G.R.O.W.T.H: A Systematic Framework for Enhancing Graduate Employment Through Data-Driven Job Matching** prepared and submitted by Kinneth A. Daluag, Lucky Arius G. Desabille, Mc Bill Kline U. Ventic and Ana Mae C. Yamyamin has been examined and is recommended for approval and acceptance.

Recommended:

NOREEN B. FUENTES, Ph. D, DIT

Adviser

APPROVED by the Committee on PROPOSAL HEARING with a verdict of **APPROVED WITH MINOR REVISIONS** on **MAY 08, 2025**.

GIBE S. TIROL, MIT

Chairman

JANETH S. UGANG, Ph. D.

Member

EMELIE C. VILLACERAN, Ph. D.

Member

ACCEPTED and **APPROVED** in a partial fulfillment of the requirements in Bachelor of Science in Information Systems

GERRY RITZ R. DENSING, Ph. D.

Associate Dean, CCICT

JOSE MARIA S. GARCIA II, Ph. D.

Dean, CCICT

ACKNOWLEDGEMENT

We, the researcher of G.R.O.W.T.H. Project, wish to express our sincerest gratitude to all who supported us in this process. Without the members' guidance, support and more importantly, their faith in our vision, this capstone would not be realized.

We thank the powerful, unerring hand of Almighty God for those near-miraculous gifts that give us strength, clarity, and determination to see this road to its end. In times of doubt, His presence gave us mission and optimism.

We are eternally grateful to our families for love and support everywhere. We were patient and supported and they were encouraged as late nights saw us researching, developing, and revising.

We owe many thanks to our hard-working adviser, Ms. Noreen B. Fuentes, for her relentless mentoring, constructive criticisms, and enduring patience. His guidance actually transformed some of us and made for a better and more respectful body of work.

To the faculty and staff of Cebu Technological University – Main Campus, College of Technology for an academically rich atmosphere and inculcating a culture of innovation and excellence.

Special thanks to the CTU-PESO office for their cooperation and confidence that enabled us to tailor our system towards the real environment.

Finally, we acknowledge our fellow team members. This project was not just about work, it was about shared dreams, sleepless nights, and overcoming obstacles together. The lessons we learned and the bonds we formed will remain with us beyond this project. It is more than a task we have to do it is an indication of our progress, collectivism, and optimism about the future of other CTU graduates.

The Researchers

DEDICATION

This Capstone Project, G.R.O.W.T.H. is dedicated entirely to the individuals that have been the support system of our lives during this entire process.

To our loving parents and families, you love, patience and sacrifices have been our motivation. Your faith in us, even at our darkest, drove us to push through. This achievement is not just ours it is yours too.

To our hardworking group mates, this project is all about our teamwork, common goal and determined hard work. We turned our thoughts into an operational system with meaning and impact. Thank you for the nights spent awake, the hours of debugging, the back-and-forth discussions and the inspiring words that lift us up.

Our dear adviser, Ms. Noreen B. Fuentes for your guidance, patience and support was a big help for the making of this project. Your vision and talents forced us to not settle for mediocrity, to dream big and provide a system that was greater than ourselves.

And, most important, we dedicate this work to God All Mighty. His counsel, supply, company was with is every step of the way. In our times of doubt and weariness, it was His light that led us forward.

Lastly, we would like to thank our advisers, friends, and the CTU-PESO office, for the assistance and cooperation that provided guidance and real-world perspective to this project. This one is for all who believed in us, followed us along and brought us here.
